

Program Overview

Cisco Networking Academy®
Mind Wide Open™

Cisco Networking Academy

NetAcad is a global learning program delivered through a network of partnerships with government agencies, social benefit organizations, and 9000 academies in schools, universities, community centers, and prisons.

Courses are delivered through a cloud-based collaboration platform with an emphasis on hands-on learning and career prep for a growing number of networking technology jobs in the Internet of Everything.

Program delivery is supported by hundreds of Academy Support Centers and Instructor Training Centers.

NetAcad courses reach 1 million students each year.
5 million students have completed courses since 1997.

What Is Cisco Networking Academy?

Courses developed by Cisco and partners

- ICT and networking expertise
- Delivered through global network of partnerships

Students gain critical skills:

- Technical
- Entrepreneurship
- 21st century career skills

Students attend courses at:

- Grade schools
- Colleges and universities
- Community centers and prisons

Students prepare for:

- Entry-level careers
- Technical certifications
- Entrepreneurship
- Further education

Addressing the IT Skills Gap - US

Addressing the IT Skills Gap - Europe

Andrus Ansip,
Vice-President, European Commission

“Europeans need the right skills to get the most from the digital economy and single market. Let's get people online as much as possible. It is not just about reading and writing any more. These days, in order to succeed and take off in a career, you need digital skills as a basic. There are many young people who use the internet on a daily basis but do not have the full skills needed to convert this interest into an actual job. For some years, the European Commission has been working to reverse this trend, by encouraging young people to take up ICT-related careers, and particularly women, who are very under-represented at all levels in the ICT sector in Europe.”

Source: empirica 2014

Cisco Networking Academy Program Impact

With the IT and career skills developed in Cisco Networking Academy courses, students like Veng Kanha earn 5 times the average salary in Cambodia.

Cisco Networking Academy Program Impact

“NetAcad meant I got real networking knowledge and experience so I could take on an apprenticeship job while still at the university.

This greatly improved my technical skills and made me a competent candidate in a job market dominated by men.”

Aleksandra Kaczmarek
Support Engineer, Cisco, Poland

Empowerment programs like Nina Weza at the African Women in ICT (AWICT) center in Kenya equip students with the skills and experience needed to succeed.

“I had a job two weeks after completing my internship.”

Janet Adhiambo Otieno
Customer Service Agent for Zuku and
BPO Exec for Tech Brain BPO, Kenya

To help overcome barriers to employment in the tech field for women in Sri Lanka, Kalhari Kaluarachchi, a Cisco Social Innovation Group program manager, launched Women Rock IT; a Cisco TV series featuring insights and advice from successful women in IT.

Women Rocking IT in AsiaPac

The Cisco MYTecC (Mediterranean Youth Technology Club) initiative brings together youth from the Middle East and Africa.

Students bridge cultural divides during each weeklong training program as they develop technical, leadership, business, video editing, and teamwork skills.

Watch MYTecC Video

Course Delivery

Instructor Led

Courses that are opened and taught by an instructor, in a face-to-face classroom setting, a blended classroom and distance-learning environment, or remotely.

Self Paced

Online, self-enroll courses that students complete at their own pace, at any point in their career journey, sometimes within a set time frame.

Self-paced offerings include podcasts.

Who Develops Courses?

Instructor-led and self-paced courses offered in partnership with schools and organizations around the world.

Topics include routing and switching, network configurations, and network security

Community

Learning materials developed by NetAcad instructors in partnership with Cisco.

Community developed courses can be accessed by instructors who want to expose students to essential technology concepts like cloud and collaboration.

Partners

Courses developed by partner organizations and offered to NetAcad students to help broaden their skills and improve career prospects.

Operating Systems & Information Technology

Why OS & IT?

A basic understanding of computer operating systems and information technologies provides the foundational knowledge needed for students to connect to the Internet and understand how systems and processes work together to power the Internet of Everything.

In partnership with NDG, we offer several courses on Linux, which is increasingly regarded as an essential platform for application development. These courses teach the skills needed to fill a growing number of jobs in the information and communication technology (ICT) field.

Career Prep

Courses range from Internet connectivity and social networking basics to teaching the skills needed to gain career certifications as a support technician, system administrator, network technician, or Linux professional.

Get Connected

Course Overview

Get Connected teaches the basic information technology skills needed to compete in the global workforce, with a focus on basic communication and collaboration technologies.

Students are introduced to the Internet and experiment with various social networking sites.

Prerequisites: None

Languages: English, Spanish, Portuguese-BR

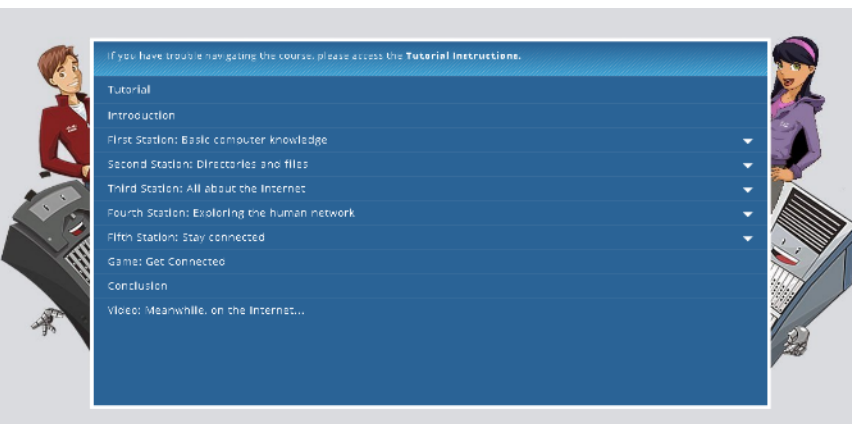

Course Delivery: Instructor led or self paced

Estimated Time to Complete: 30 hours

Recommended Next Course: IT Essentials

Career Prep

Non-IT students specifically, and anyone seeking to develop basic ICT and social networking skills, which are essential for career advancement.

Learning Components

- 5 chapters
- Illustrations and narrations guide students through topics
- Videos and activities
- Quizzes

IT Essentials

Course Overview

IT Essentials covers the fundamentals of computer hardware and software and introduces advanced security and networking concepts.

Students learn how to assemble computers and troubleshoot hardware and software issues.

Career Prep

Upper secondary and junior college students seeking career-oriented, entry-level hardware and software skills to prepare for technical support roles. Aligns with the CompTIA A+ certification for IT support technicians, administrators, and specialists.

Prerequisites: None

Languages: Arabic, Chinese-S, Chinese-T, Croatian, English, French, German, Hebrew, Hungarian, Italian, Japanese, Portuguese-Brazilian, Romanian, Russian, Spanish, Turkish, Ukrainian

Course Delivery: Instructor led

Estimated Time to Complete: 70 hours

Recommended Next Course: CCNA R&S Intro to Networks

Learning Components

- 12 chapters
- 180 hands-on labs and learning activities
- Cisco Packet Tracer, virtual laptop, and virtual desktop learning tools
- 12 chapter exams, 1 checkpoint exam, 1 skills review exam, 1 practice final exam, 1 final exam, 1 skills-based assessment, and 2 practice exams for CompTIA A+ certification

NDG Linux Essentials

Course Overview

The Linux Essentials course, developed by NetAcad partner NDG, teaches students the fundamentals of the Linux operating system and command line and open source concepts.

The Linux virtual machine is embedded in the course; allowing students to experiment with Linux commands.

Career Prep

Upper secondary school and junior college students interested in learning Linux OS, open source programming, and IoT skills to expand IT knowledge beyond networking. Aligns with the Linux Professional Institute (LPI) Linux Essentials Professional Development Certificate.

Prerequisites: None

Language: English

Course Delivery: Instructor led and Self-paced*

Estimated Time to Complete: 70 hours

***Fee:** \$39.95 USD for Self-paced only

Recommended Next Course: CCNA R&S
Introduction to Networks

Network Development Group

Overview

Linux Essentials Course

Why is knowing the command line important?

Flexibility and mobility!

By understanding the foundation of Linux, you have the ability to work on ANY Linux distribution. This could mean one company with a mixed environment or a new company with a different Linux distribution.

Learning Components

- 16 chapters
- Built-in virtual machine to experiment with Linux commands
- 13 lab exercises
- Learner-directed activities
- Chapter exams, mid-term, and final exam

NDG Introduction to Linux I

Course Overview

The NDG Introduction to Linux I course, developed by NetAcad partner NDG, teaches students the Linux skills required to prepare for the Linux Professional Institute LPIC-1 first certification exam or the CompTIA Linux+ powered by LPI first certification exam.

Prerequisites: None required, but NDG Linux Essentials or equiv. knowledge recommended

Language: English

Course Delivery: Instructor led* and Self-paced*

Estimated Time to Complete: 70 hours

***Fee:** \$39.95 USD per learner.

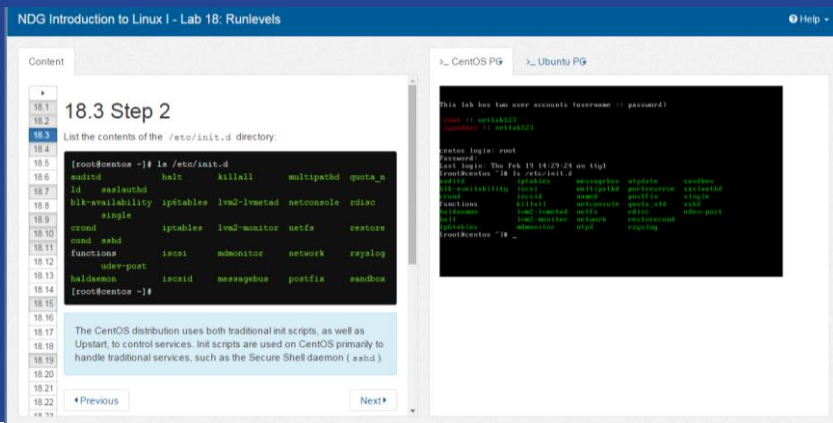

Recommended Next Course: NDG Intro to Linux II

Career Prep

Aligns with the Linux Professional Institute LPIC-1 and CompTIA Linux+ powered by LPI first exam.

NDG Introduction to Linux I

Learning Components

- 27 chapters
- Built-in virtual machine to experiment with Linux commands
- 24 lab exercises
- Learner-directed activities
- Chapter exams, mid-term, and final exam

NDG Introduction to Linux II

Course Overview

The NDG Introduction to Linux II course, developed by NetAcad partner NDG, teaches students the Linux skills required to prepare for the Linux Professional Institute LPIC-1 second certification exam or the CompTIA Linux+ powered by LPI second certification exam.

Prerequisites: None

Language: English

Course Delivery: Instructor led* and Self-paced*

Estimated Time to Complete: 70 hours

***Fee:** \$39.95 USD per learner

Recommended Next Course: CCNA R&S Intro to Networks

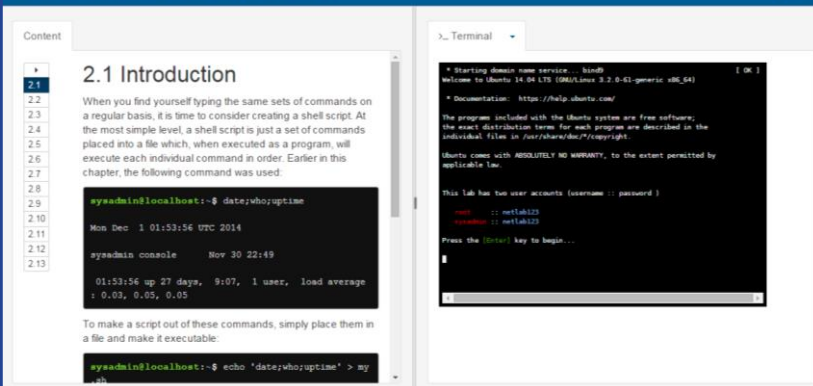

Career Prep

Aligns with the Linux Professional Institute LPIC-1 and CompTIA Linux+ powered by LPI second exam.

NDG Introduction to Linux II

NDG Introduction to Linux II - Chapter 2 - Shell Scripts

Learning Components

- 19 chapters
- Built-in virtual machine to experiment with Linux commands
- 19 lab exercises
- Learner-directed activities
- Chapter exams, mid-term, and final exam

Networking

Why Networking?

As our world becomes increasingly reliant on computer networks and networking technologies, there's a growing need for professionals who can design, build, manage, and secure networks.

Our networking courses introduce students to a range of topics, from routing protocols and network applications to network services and configurations. The courses emphasize hands-on learning and troubleshooting.

Career Prep

Our networking courses align with globally recognized career certifications including Cisco CCENT, CCNA R&S, and CCNP R&S.

Students learn how to become network administrators and network managers.

CCNA Routing
& Switching

CCNA Routing and Switching Curriculum

Curriculum Overview

The 4 courses in the CCNA R&S curriculum help students develop a comprehensive understanding of how networks operate, from protocols and services to network management, with an emphasis on hands-on learning and essential career skills like problem solving and collaboration.

Career Prep

Courses 1-2 align with the Cisco CCENT certification and courses 3-4 align with the Cisco CCNA R&S certification. Students gain the skills needed to become network administrators, technicians, or managers.

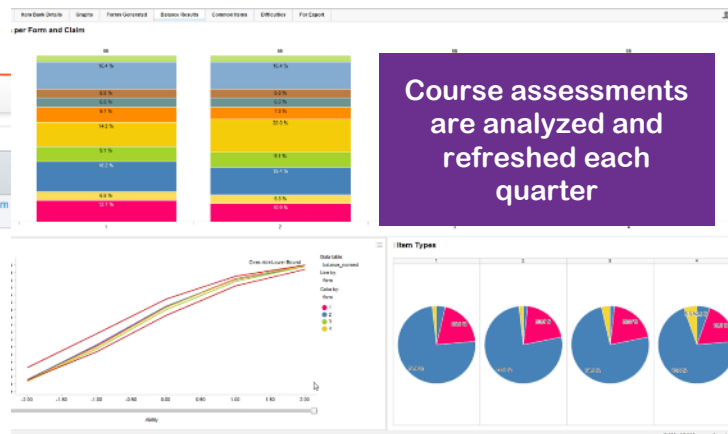

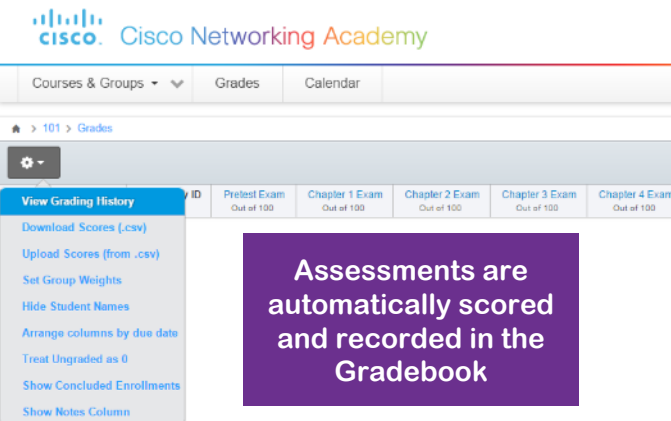

Prerequisites: IT Essentials or equivalent knowledge

Languages: Arabic, Chinese-Simplified, English, French, Japanese, Portuguese-Brazilian, Russian, Spanish (courses 1 and 2 also available in German, Hungarian, and Turkish; course 1 also available in Romanian)

Course Delivery: Instructor led

Estimated Time to Complete: 280 hours

Recommended Next Course: CCNA Security or CCNP

Learning Components

- 4 courses: Introduction to Networks, Routing and Switching Essentials, Scaling Networks, Connecting Network
- Hands-on labs and Cisco Packet Tracer network simulation activities
- Videos and activities to reinforce learning
- Quizzes and exams to measure learning outcomes

CCNA R&S: Introduction to Networks

Course Overview

The first course in the Cisco CCNA Routing and Switching curriculum teaches students about the architecture, structure, functions and components of the Internet and other computer networks.

Students gain an essential foundational understanding of how networks operate.

Career Prep

Secondary school through university students seeking skills for entry-level networking jobs or more specialized ICT training.

Prerequisites: IT Essentials or equivalent knowledge

Languages: Arabic, Chinese-Simplified, Croatian, English, French, German, Hungarian, Japanese, Portuguese-Brazilian, Polish, Romanian, Russian, Spanish, Turkish

Course Delivery: Instructor led

Estimated Time to Complete: 70 hours

Recommended Next Course: CCNA R&S Routing & Switching Essentials

Chapter 8: IP Addressing / 8.2.4.2 Static Configuration of a Global Unicast Address

IPv6 Network Addresses

Router Configuration

Model IPv6 configuration and verification commands in the Cisco IOS are similar to their IPv4 counterparts. In many cases the only difference is the use of `ipv6` in place of `ip` within the commands.

The `interface` command to configure an IPv6 global unicast address on an interface is `ipv6 address` `ipv6-address/prefix-length`.

Notice that there is not a space between `ipv6-address` and `prefix-length`.

The example configuration will use the topology shown in Figure 1 and these IPv6 subnets:

- 2001:DB8:ACAD:1::/64
- 2001:DB8:ACAD:2::/64
- 2001:DB8:ACAD:3::/64

As shown in Figure 2, the commands required to configure the IPv6 global unicast address on the GigabitEthernet 0/0 interface of R1 would be:

```
Router(config)#interface gigabitethernet 0/0
Router(config-if)#ipv6 address 2001:db8:acad:1::1/64
Router(config-if)#no shutdown
Router(config-if)#exit
Router(config)#interface gigabitethernet 0/1
Router(config-if)#ipv6 address 2001:db8:acad:2::1/64
Router(config-if)#no shutdown
Router(config-if)#exit
Router(config)#interface serial 0/0/0
Router(config-if)#ipv6 address 2001:db8:acad:3::1/64
Router(config-if)#clock rate 56000
Router(config-if)#no shutdown
```

Host Configuration

Similarly, configuring the IPv6 address on a host is similar to configuring an IPv4.

Activity – Unicast, Broadcast, or Multicast?

Click **Start** to view the Destination IP Address. Next, click the host(s) which will receive a packet based on the address type (Unicast, Broadcast or Multicast).

This is a timed activity.

Time Remaining: 10

Destination IP Address =

Source Host

- Pre-test, 11 chapter quizzes, 2 sectional quizzes, 11 chapter exams, and 1 final exam
- 2 Cisco Packet Tracer Skills Based Assessments

CCNA R&S: Routing and Switching Essentials

Course Overview

The second course in the CCNA Routing and Switching curriculum describes the architecture, components, and operations of routers and switches in a small network.

Students learn how to configure a router and a switch for basic functionality

Career Prep

Secondary school through university students seeking Cisco CCENT certification and skills for entry-level network technician jobs.

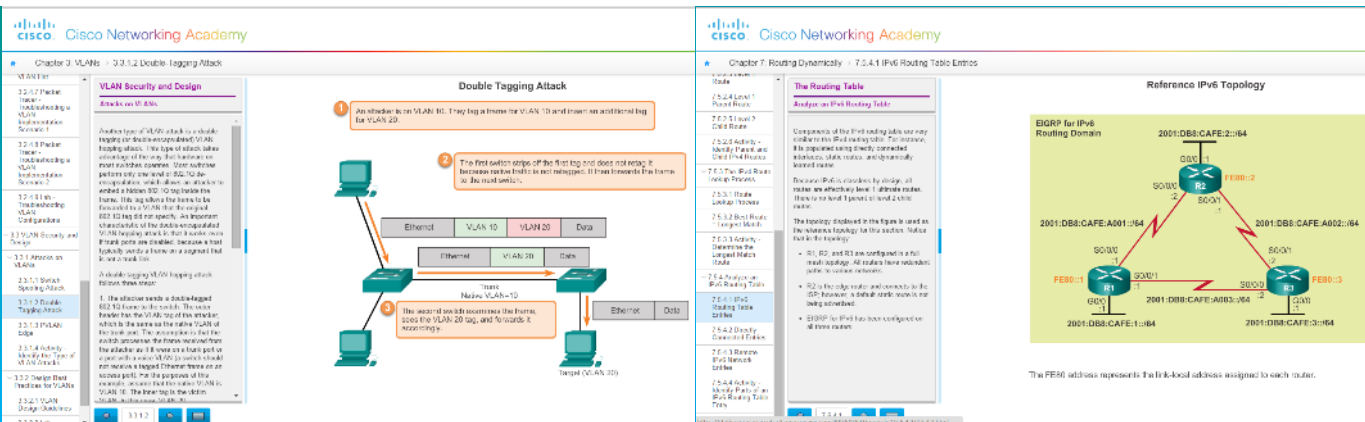

Prerequisites: CCNA R&S: Introduction to Networks

Languages: Arabic, Chinese-Simplified, English, French, German, Hungarian, Japanese, Portuguese-Brazilian, Polish, Russian, Spanish, Turkish

Course Delivery: Instructor led

Estimated Time to Complete: 70 hours

Recommended Next Course: CCNA R&S Scaling Networks or CCNA Security

Learning Components

- 11 chapters
- 33 hands-on labs and 1 hands-on skills assessment
- Pre-test, 11 chapter quizzes, 11 chapter exams, 2 sectional quizzes, and 1 final exam
- 3 Cisco Packet Tracer Skills Based Assessments

CCNA R&S: Scaling Networks

Course Overview

The third course in the CCNA Routing and Switching curriculum describes the architecture and operations of routers and switches in large, complex networks.

Students learn how to configure and troubleshoot routing and switching technologies and protocols.

Career Prep

Junior college and university students seeking skills for entry-level network administration jobs or more specialized ICT training

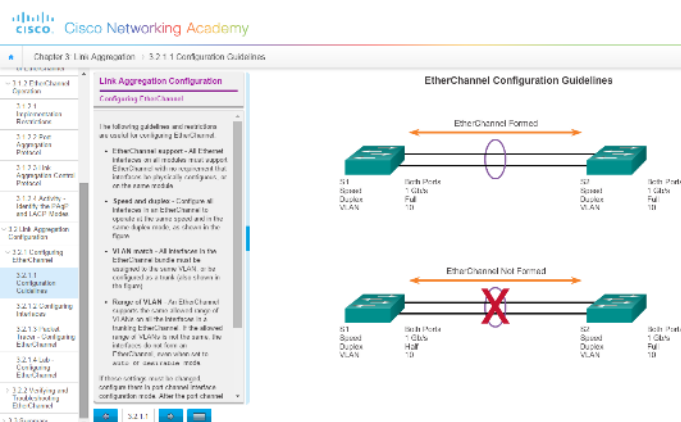

Prerequisites: CCNA R&S: Routing & Switching Essentials

Languages: Arabic, Chinese-Simplified, English, French, Japanese, Portuguese-Brazilian, Russian, Spanish

Course Delivery: Instructor led

Estimated Time to Complete: 70 hours

Recommended Next Course: CCNA R&S Connecting Networks

Learning Components

- 9 chapters
- 19 hands-on labs and 2 hands-on skills assessments
- Pre-test, 9 chapter quizzes, 9 chapter exams, 2 sectional quizzes, and 1 final exam
- 2 Cisco Packet Tracer Skills Based Assessments

CCNA R&S: Connecting Networks

Course Overview

The fourth and final course in the CCNA Routing and Switching curriculum covers the WAN technologies and network services employed by converged applications in a complex network.

Students learn how to configure and troubleshoot network devices and implement virtual private networks.

Career Prep

Junior college and university students seeking Cisco CCNA R&S certification and skills for entry-level network administration jobs

Prerequisites: CCNA R&S: Scaling Networks

Languages: Arabic, Chinese-Simplified, English, French, Japanese, Portuguese-Brazilian, Russian, Spanish

Course Delivery: Instructor led

Estimated Time to Complete: 70 hours

Multi Building Enterprise Network Design

Building A: Management
Building B: Marketing and Sales
Building C: Engineering
Building D: Research and Development
Building E: Information Technology
Building F: Data Center

Activity – Gathering Symptoms of a Network Problem
Match each of the commands used to gather information about network problems to its definition.

Command	Definition
show protocols	Sends an echo request to an address and waits for a reply.
show ipv6 route	Shows the path a packet takes through the networks.
telnet	Displays a summary status of all the IP version 6 interfaces on a device.
ping	Shows the current configuration of the device.
debug ?	Displays the IP version 6 routing table.
traceroute	Offers a list of options for real-time diagnostics.
show running-config	Shows global and interface specific status of Layer 3 protocols.
show ipv6 interface brief	Connects remotely to a device by IP address or URL.

Check **Reset**

Learning Components

- 9 chapters
- 12 hands-on labs and 1 hands-on skills assessment
- Pre-test, 9 chapter quizzes, 9 chapter exams, 2 sectional quizzes, and 1 final exam
- 2 Cisco Packet Tracer Skills Based Assessments

CCNP Routing & Switching

Course Overview

The three CCNP Routing & Switching courses provide a comprehensive overview of enterprise-level networking concepts, including advanced routing, switching, and troubleshooting.

The curriculum integrates industry-relevant instructional approaches to help students prepare for career opportunities.

Career Prep

College students seeking hands-on practical experience, Cisco CCNP R&S certification, and career skills in advanced routing, switching, and troubleshooting.

Prerequisites: CCNA R&S courses 1 - 4

Languages: English

Course Delivery: Instructor led, textbook based

Estimated Time to Complete: 210 hours

Learning Components

- 3 courses: CCNP R&S ROUTE: Implementing IP Routing, CCNP R&S SWITCH: Implementing IP Switched Networks, and CCNP R&S TSHOOT: Troubleshooting and Maintaining IP Networks
- Hands-on labs
- Cisco Press textbooks
- Chapter exams and final exams

Security

Why Security?

The demand for security experts has grown three times faster than the demand for other information and communication technology professionals.

Our security courses equip students with the skills needed to protect networks from those with malicious intent to help ensure the integrity and availability of data and services.

Career Prep

Our security courses teach the core concepts and skills needed to secure and protect computer networks and explore career opportunities.

CCNA Security aligns with the Cisco CCNA Security certification.

Learning Components

- 11 chapters, quizzes, and chapter exams
- 13 Cisco® Packet Tracer activities and one Packet Tracer Practice Skills Based Assessment (SBA)
- 16 hands-on labs
- One each: pre-test, certification practice exam, practice final, final exam and skills-based assessment

Technology

Why Technology?

Our Technology content is developed by a community of NetAcad instructors and covers concepts related to computer networks, such as cloud computing and wireless technologies.

Instructors may use these learning materials to create courses for students.

Career Prep

These learning resources are designed to expand knowledge of networking-related technologies and provide an overview of technologies students may encounter in their careers.

Mobility Fundamentals Series

Series Overview

Starting with Wireless Technology Standards, the Mobility Fundamentals series teaches students about wireless and mobility technologies in the Internet of Everything.

Topics covered in these instructor-developed courses include wireless LAN design and mobility applications.

Career Prep

Builds foundational wireless and mobility technology career skills for current IT Essentials or CCNA R&S students interested in learning more about the Internet of Everything.

Prerequisites: IT Essentials or CCNA R&S 1-2

Languages: English

Course Delivery: Self paced

Estimated Time to Complete: 1.5 hour (each course)

Recommended Next Course: Mobility Fundamentals Series: Wireless LAN Networks (next in the Mobility Series)

Learning Components

- Several modules of multimedia content
- Video recordings featuring NetAcad instructors
- Activities that reinforce learning, including Cisco Packet Tracer activities
- Assessments, including module quizzes
- Certificates of completion for each module

Cisco Packet Tracer

Why Packet Tracer?

The Cisco Packet Tracer simulation tool allows students to experiment with network behavior in a virtual environment. It supplements physical networking equipment by allowing students to create virtual networks with unlimited devices; encouraging practice, discovery, and troubleshooting.

As an integral part of the NetAcad learning experience, Packet Tracer provides simulation, visualization, authoring, assessment, and collaboration capabilities and facilitates the teaching and learning of complex technology concepts.

Career Prep

The Packet Tracer simulation-based learning environment promotes the development of essential career skills ranging from teamwork and critical thinking to creative problem solving.

Cisco Packet Tracer

Series Overview

The Packet Tracer Know How Series introduces tips and best practices to help instructors and students use Cisco Packet Tracer as an effective and engaging learning and assessment tool.

Internet of Everything

Why IoE?

As the number of networked connections between people, processes, data, and things grows exponentially, it's essential to understand the technologies that enable the Internet of Everything (IoE), and how increased connectivity creates new opportunities to excel and improve business processes, and address some of the world's greatest challenges.

These courses broaden students' thinking beyond core networking and technology concepts.

Career Prep

Students explore the technologies that underpin the IoE and learn about millions of career opportunities that are emerging from data centers, cloud computing, big data, and the Internet of Things.

-  Intro IoE Summary Podcast
-  Introduction to the Internet of Everything **PT**
- Smart Grid (German)
- IoE: Connecting Data
- IoE: Connecting People & Process
- IoE: Connecting Things

Introduction to the Internet of Everything Summary Podcast

Series Overview

This podcast series provides an introduction to the future of the Internet, where a network foundation connects billions of things and trillions of gigabytes of data, enhancing our decision making and daily interactions.

It can be used to prepare for the Introduction to the Internet of Everything course.

Prerequisites: None

Languages: English

Delivery Method: mp3 files

Estimated Time to Complete: 2.5 hours

Recommended Next Course: Introduction to the Internet of Everything

Career Prep

Anyone seeking to develop a broad understanding of trends, technologies, and career opportunities in the Internet of Everything.

Learning Components

- 5 modules featuring a panel of IoE experts
- Links to related resources
- Downloadable mp3 files

Introduction to the Internet of Everything

Course Overview

The Introduction to the Internet of Everything (Intro to IoE) course introduces learners to the technologies that support the IoE, and the career and social opportunities created by the growing number of networked connections between people, processes, data, and things.

Career Prep

Secondary school through university students seeking an overview of trends, technologies, and career opportunities in the Internet of Everything.

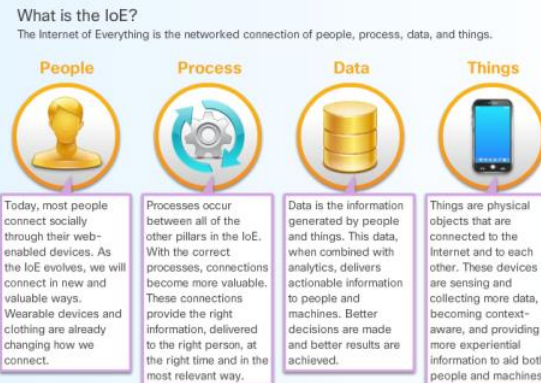

Prerequisites: None

Languages: Chinese-Simplified & Traditional, English, French, Japanese, Portuguese-BR, Russian, Spanish

Course Delivery: Instructor led or self paced

Estimated Time to Complete: 20 hours

Recommended Next Course: IT Essentials or CCNA R&S Introduction to Networks

Learning Components

- 5 modules of interactive content featuring IoE experts
- Activities, videos, and simulations to enhance the learning experience
- Pre-test, module quizzes, and a final exam

Smart Grid

Overview

Smart Grid presents the necessary devices and their function used in a smart grid home system. The course discusses connecting smart meters with a home area network (HAN), integrating smart meter gateways in a wide area network (WAN), and installation procedures and security aspects based on German technical regulations.

Prerequisites: None, basic competence in electrical engineering recommended

Languages: German

Course Delivery: Instructor Led

Estimated Time to Complete: 80 hours

Recommended Next Course: CCNA R&S

Career Prep

Builds foundational smart grid career skills for current employees in electrical installation and those in initial vocational education and training for a career in electrical installation and electrical engineering.

Learning Components

- Several modules of multimedia content
- Activities that reinforce learning
- Cisco Packet Tracer activities (under construction)
- Assessments, including module quizzes

Entrepreneurship

Why Entrepreneurship?

In addition to technology skills, business owners and professionals need entrepreneurial skills such as creative thinking, communication, business management, and problem solving skills.

Our Entrepreneurship offerings help students develop essential skills to successfully launch new ventures or excel within team environments.

They broaden students' thinking beyond core networking and technology concepts.

Career Prep

Our Entrepreneurship courses help students develop an entrepreneurial mindset and cultivate the habits and skills needed for success in the Internet of Everything.

Entrepreneurship

Be Your
Own Boss

Entrepreneurship

Course Overview

Entrepreneurship supplements the ICT skills gained in CCNA R&S curriculum by teaching business and financial skills, behaviors, and attitudes, to help students develop an entrepreneurial mindset.

Students learn by completing a series of interactive case studies.

Career Prep

High school through college students seeking to supplement ICT expertise with entrepreneurial thinking, business development, and financial management skills.

Prerequisites: None

Languages: Arabic, Chinese-Traditional and Simplified, English, and Spanish

Course Delivery: Self paced or instructor led

Estimated Time to Complete: 15 hours

Recommended Next Course: CCNA R&S ITN

Entrepreneurship

Course Introduction

The Aspire game is an interactive game where you must use the skills and knowledge learned in other Cisco Networking Academy courses, as well as the business and soft skills you learned in Entrepreneurship. You will not only be asked to set up and configure computers, you will also have to make timely business decisions.

Click the buttons to learn more about Aspire to see the business challenges and the technical challenges that this game offers. You can go as far along in the game as you like. If the technical challenges are beyond your current expertise, you may still want to give them a try. You might surprise yourself!
